## RESEARCH PROJECTS

### A Study of Cantonese Sentence Particles – A Discourse Approach

- ✍ LEE Siu Lun
- ☐ 1 November 1998
- ❖ Student Campus Work Scheme, CUHK

Cantonese sentence final particles like, la, ge, laak, bo, wo, la gwa, etc appear very frequently in daily conversations. There are already many studies examining the "meaning" of some of those final particles. Most of the previous studies focus on the syntactic level. Teaching materials introducing Cantonese sentence particles are limited in number and most of them just "define" the particles. Learners learning Cantonese as their second language find it difficult to put the particles into actual conversations and in a connected discourse. So in order to grasp the "meaning" as well as the usage of the sentence particles, learners either need to use it by trial and error (which sometimes cause embarrassment) or need to learn the context where certain particle is used and how the particles are used in a discourse. In view of this, this paper would analyse Cantonese sentence particles on a discourse bases. A database is created based on connected written and spoken discourse. The data are categorized and analysed with examples according to their discourse nature, e.g. request, order, question, command, etc. The database will be helpful

for material development and linguists who are interested in the topic.  
(AL98045)

### Cantonese Idioms

- ✍ LO TAM Fee Yin
- ☐ 1 November 1998
- ❖ Student Campus Work Scheme, CUHK

The material focuses primarily on the metaphorical use of language pervasive in Cantonese idioms. It is corroborated by linguists that metaphorical use of language is one of the five Ideal Cognitive Modes that underly the creative aspects of human language systems.  
(AL98022)
