ID: 992 4969 9833 Passcode: 983837

Dr. John Eastwood

President, Society of Exploration Geophysicists (SEG)

In this talk I will share my thoughts on the value proposition of the Society of Exploration Geophysicists. And more importantly discuss "the Why" of the SEG and how you, through your participation, can contribute to the science of applied geophysics, society and your own growth.

In addition I intend to share some key learnings over my 30 plus career in Oil and Gas - applied geophysics both as a researcher/individual contributor as well as a manager and executive with ExxonMobil and relate those learning back to the SEG.
